

Holiday Homes for Rent in Hacienda La Ermita, Murcia

Town House, 2 Bedroom

A newly built, well-equipped, three-storey town house with balcony, three bedrooms to sleep up to six people. Located within easy reach of the San Pedro and Mediterranean beaches, the house overlooks a beautiful nature reserve.

San Pedro del Pinatar is situated on the North-West corner of the Mar Menor, the largest saltwater lagoon in Europe, covering a surface area of 170sq.m. and having a maximum depth of only 7 metres. This area boasts mild winters, very low annual rainfall and over 3000 hours of sunshine each year, giving the region a very dry atmosphere all year round. The Mar Menor is ideally suited to water sports of all kinds and the nearby La Manga strip provides facilities for hang-gliding, parachuting, karting and roller skating. If you prefer, you can just take it easy and enjoy the beautiful beaches or nearby hills. San Pedro is also home to the Saltwater Nature Reserve, a unique Mediterranean coastal spot. Flamingos and other migratory birds rest here every year using this as a stopping place between Europe and Africa.

As well as the many and varied water based activities, golf enthusiasts are also well catered for with one of Spain's best, the internationally renowned "La Manga Club" and the recently opened Sucina Golf and Country Club just inland from the San Javier (Murcia) airport.

San Pedro del Pinatar is one of the main tourist destinations along the Murcia coast. Traditionally a seafaring and agricultural centre, San Pedro has become one of the principal towns of the Costa Calida. The main attractions of San Pedro are concentrated around the beach and shore as here you will find the beach area of Lo Pagan. This superb beach is a lovely tourist centre which has something to suit every taste. Next to the long promenade facing Mar Menor, are the extensive beaches of La Puntica and La Curva. This coastal setting, combined with the facilities at its marina, means you can experience many water sports

including sailing, scuba diving and windsurfing, and when you get time to relax, visit the many hotels, bars, restaurants and shops.

The waters of the Mar Menor have very high therapeutic qualities and together with the climatic conditions have produced large deposits of mud and clay. These muddy deposits are believed, by many, to contain natural healing properties, particularly for many skin complaints. They also possess anti-inflammatory properties important for the treatment of rheumatism, arthritis and bone fractures.

Property Details
